# Introduction

*Where Workers Work* features basic private sector employment totals (i.e., employment covered by the Illinois Unemployment Insurance Act) for six northeastern Illinois counties (Cook, DuPage, Kane, Lake, McHenry and Will), major communities in each of these counties, and zip codes within the City of Chicago. These are six of the counties in the Illinois portion of the Chicago-Naperville-Elgin, IL-IN-WI MSA, as announced by the U.S. OMB in February 2013.

Data for the other three Illinois counties (DeKalb, Kendall and Grundy) that are included in the Illinois portion of the Chicago-Naperville-Elgin, IL-IN-WI MSA, but not part of this report, are available at [http://www.ides.illinois.gov/LMI/Pages/Quarterly\\_Census\\_of\\_Employment\\_and\\_Wages.aspx](http://www.ides.illinois.gov/LMI/Pages/Quarterly_Census_of_Employment_and_Wages.aspx).

*Where Workers Work* utilizes administrative data collected under the Illinois Unemployment Insurance Act. The Act requires employers to report their employment, and this information becomes part of the Quarterly Census of Employment and Wages database (ES-202) on which *Where Workers Work* is based. The Act does not require employers to report their employment by individual work locations. However, data in *Where Workers Work* do, wherever possible, reflect actual worksites of work locations. It should be noted that specific community data may be impacted to a significant extent by employer reporting inconsistencies.

**QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records and reflect**

**the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes. For example, economic change would come from a firm relocating into the county; administrative change would come from a company correcting its county designation.**

Effective with the 1998-89 edition, **O'Hare International Airport** was reported as part of the City of Chicago rather than Northwest Suburban Cook; appropriate adjustments have been made so that the historical data shown in this edition also reflect that change.

Effective with the 1972 edition, more than 20 **new suburban communities** were broken out from "miscellaneous" and "unclassified" groupings and are so noted. Effective with 2002 data, **another 19 breakouts** were added and are so noted. Finally, the zip code 60648 is no longer shown because the zip code has been deleted by the U.S. Postal Service.

The **industry breakouts** in these tables are identified by name and by NAICS (North American Industry Classification System) code. The data tables for *Where Workers Work* began using NAICS in 2001. The data tables used Standard Industrial Classification (SIC) industry coding prior to 2001. Data for employment is not comparable at the industry level for SIC and NAICS.

# Highlights

The preliminary 2017 total for UI-covered (private sector) employment in the metro area increased to 3,555,979 - which is up 1.4 percent or 48,145 jobs.

## Employment levels increased in Cook County and in four of the five collar counties

<b>Total Metro</b>	up 1.4 percent	or 48,145	for a total of	3,555,979
Cook County	up 1.0 percent	or 22,280	for a total of	2,246,987
Du Page County	up 1.9 percent	or 10,284	for a total of	565,134
Kane County	up 2.1 percent	or 3,638	for a total of	175,520
Lake County	down 0.1 percent	with a loss of 350	for a total of	284,927
Mc Henry County	up 1.4 percent	or 1,086	for a total of	80,857
Will County	up 5.9 percent	or 11,207	for a total of	202,554
City of Chicago	up 2.1 percent	or 24,123	for a total of	1,179,455

## The number of establishments decreased overall for the Chicago Metro Area

The number of establishments in the Chicago metro area decreased by 28,171 (-11.1%) from 2016 to 2017p (p=preliminary data) for a total of 225,335. The primary reason for this change in the number of establishments was the implementation of a new unemployment insurance tax system in 2017 and allowed IDES to more accurately account for inactive accounts (with zero wages and zero employment). Due to the deactivation of a larger number of accounts in 2017 versus 2016, it does not make sense to compare the difference in the number of establishments over the year.

*NOTE: In 2016, IDES instituted a policy to deactivate employer accounts with zero employment and zero wages for eight or more quarters. In 2017, a new tax system became operational which allowed for the deactivation of accounts that should have been deactivated earlier. In the future, accounts will be deactivated on a regular basis.*

# Where Workers Work Announcement

The *Where Workers Work* publication features employment totals that are broken out by the North American Industry Classification System (NAICS) categories. NAICS provides industry categories which better reflect the United States and Illinois economies.

Industries are organized on the basis of their production activities (supply) alone, as opposed to the mixture of supply and demand characteristics used to classify industries under the SIC. NAICS also standardizes the classification system of the 3 partners in the North American Free Trade Agreement (NAFTA): the United States, Canada, and Mexico.

More information on NAICS can be found at the following Web address:

<http://www.census.gov> and clicking on the link to NAICS or through this direct Web address:

The institution of multiple worksite coding precludes the comparison of data beginning with 1991 with data from earlier years.

City of Chicago includes O'Hare International Airport.
