# Introduction

*Where Workers Work* features basic private sector employment totals (i.e., employment covered by the Illinois Unemployment Insurance Act) for six northeastern Illinois counties (Cook, DuPage, Kane, Lake, McHenry and Will), major communities in each of these counties, and zip codes within the City of Chicago. These are the six counties in the Illinois portion of the Chicago-Naperville-Elgin, IL-IN-WI MSA, as announced by the U.S. OMB in February 2013.

Data for the other three Illinois counties (DeKalb, Kendall and Grundy) that are included in the Illinois portion of the Chicago-Naperville-Elgin, IL-IN-WI MSA, but not part of this report, are available at [http://www.ides.illinois.gov/LMI/Pages/Quarterly\\_Census\\_of\\_Employment\\_and\\_Wages.aspx](http://www.ides.illinois.gov/LMI/Pages/Quarterly_Census_of_Employment_and_Wages.aspx).

*Where Workers Work* utilizes administrative data collected under the Illinois Unemployment Insurance Act. The Act requires employers to report their employment, and this information becomes part of the Quarterly Census of Employment and Wages database (ES-202) on which *Where Workers Work* is based. The Act does not require employers to report their employment by individual work locations. However, data in *Where Workers Work* do, wherever possible, reflect actual worksites of work locations. It should be noted that specific community data may be impacted to a significant extent by employer reporting inconsistencies.

**QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records and reflect the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county**

**or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes. For example, economic change would come from a firm relocating into the county; administrative change would come from a company correcting its county designation.**

Effective with the 1988-89 edition, **O’Hare International Airport** was reported as part of the City of Chicago rather than Northwest Suburban Cook; appropriate adjustments have been made so that the historical data shown in this edition also reflect that change.

Effective with the 1972 edition, more than 20 **new suburban communities** were broken out from “miscellaneous” and “unclassified” groupings. Effective with 2002 data, 19 breakouts were added. Effective with 2023 data, an additional **nine breakouts** were added. These nine new additions are noted as separated in the **Suburban Unclassified & Miscellaneous Municipalities by County** section beginning on page 6. Finally, the zip code 60648 is no longer shown because that zip code has been deleted by the U.S. Postal Service.

The **industry breakouts** in these tables are identified by name and by NAICS (North American Industry Classification System) code. The industry data tables in *Where Workers Work* are based on the NAICS coding structure, beginning in 2001. Prior to 2001, the *Where Workers Work* industry data tables were based on the Standard Industrial Classification (SIC) industry coding structure, which is not comparable to the NAICS coding structure.

# Highlights

The March employment data cited in this report were taken from employer Unemployment Insurance (UI) administrative records and reflects activity for the week including the 12th. As a result, employment reported for March 2023 reflects UI-covered private sector employment for the week of March 12th-18th, 2023; the employment data for March 2022--used for over-the-year comparisons--reflects UI-covered private sector employment for the week of March 6th-12th, 2022.

The preliminary March 2023 total for UI-covered (private sector) employment in the metro area expanded to 3,559,560, which is an increase of +62,345 jobs, a +1.8 percent change.

## Private Sector employment levels increased in Cook County and in four of the five collar counties.

*NOTE: In 2016, IDES instituted a policy to deactivate employer accounts with zero employment and zero wages for eight or more quarters. In 2017, a new tax system became operational which allowed for the deactivation of accounts that should have been deactivated earlier. Accounts are now deactivated on a regular basis.*

## Technical Notes

Data in Where Workers Work are: 1) preliminary for the most current year, 2) as of March for each year, 3) subject to revision in subsequent years, and 4) based on information collected under the Illinois Unemployment Insurance (UI) Act: The Illinois UI Act covers any employer of one or more workers in each of 20 or more calendar weeks or with a payroll of at least \$1,500 in any calendar quarter in the current or preceding calendar year. Data are for the private sector and exclude government workers.

## Geographic Definitions

**CHICAGO METRO AREA:** Cook, DuPage, Kane, Lake, McHenry, and Will counties. These are six of the counties in the Illinois portion of the Chicago-Naperville-Elgin, IL-IN-WI MSA, as announced by the U.S. OMB in February 2013.

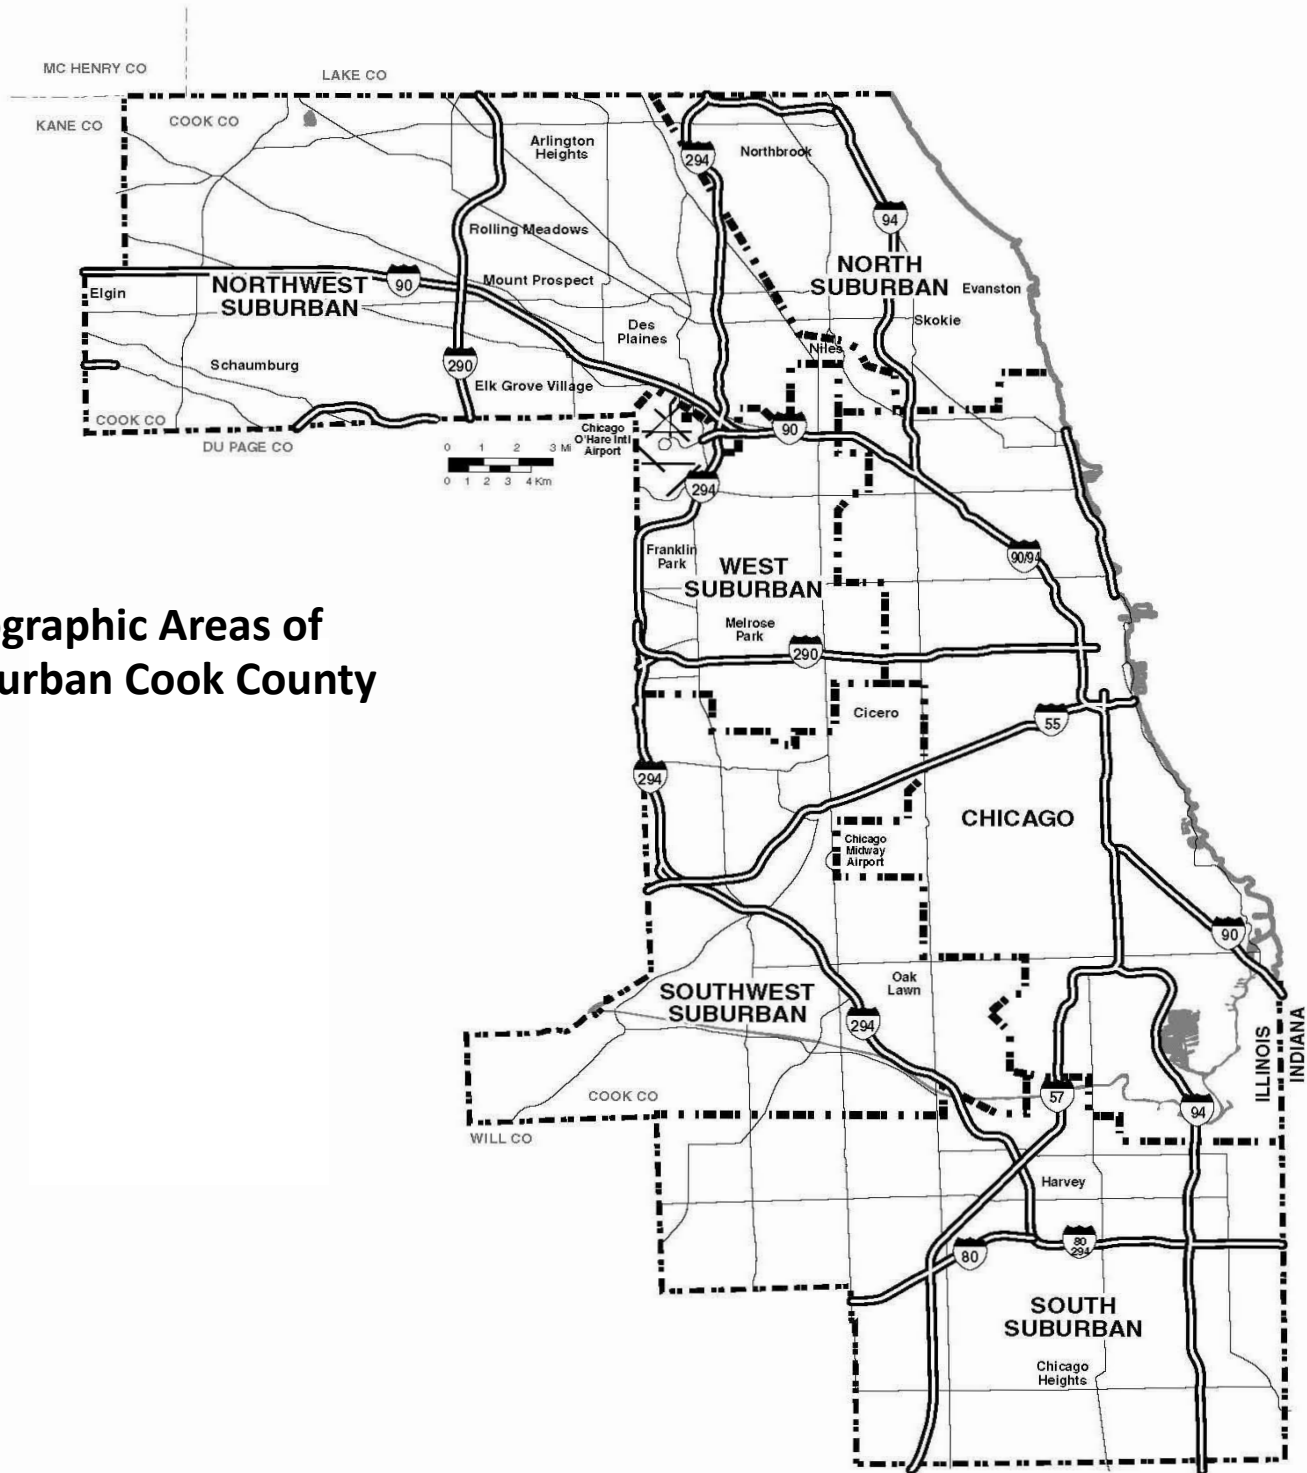

**MISCELLANEOUS AND UNCLASSIFIED AREAS:** Miscellaneous and unclassified areas include groups of neighboring suburban communities that are not reported separately either because their small size prevents us from publishing data that meets data disclosure/confidentiality standards or they have Zip Codes which overlap municipal and/or county boundaries. A description of Miscellaneous and Unclassified Suburban Areas is provided on pages 6-9 of this report.

## Special Comments

Where Workers Work utilizes administrative data collected under the Illinois Unemployment Insurance Act. The Act requires employers to report their employment, and this information becomes part of the Quarterly Census of Employment and Wages database (ES-202) on which Where Workers Work is based. The Act does not require employers to report their employment by work location.

**It should also be noted that specific community data may be impacted to a significant extent by employer reporting inconsistencies.**

# Where Workers Work Announcement

The *Where Workers Work* publication features employment totals that are broken out by the North American Industry Classification System (NAICS) categories. Industries are organized on the basis of their production activities (supply) alone, as opposed to the mixture of supply and demand characteristics used to classify industries under the SIC. NAICS also standardizes the classification system of the 3 partners in the North American Free Trade Agreement (NAFTA): the United States, Canada, and Mexico.

More information on NAICS can be found at the following Web address:

<http://www.census.gov> and clicking on the link to NAICS or through this direct Web address:

<http://www.census.gov/eos/www/naics>.

The Where Workers Work data tables are available on the Internet through this link:

<https://ides.illinois.gov/resources/labor-market-information/where-workers-work.html>.

## Data Table Notes

In the following tables A/ represents numbers omitted to avoid disclosure of individual data. The suppression of data for an industry is a two-step process.

Primary suppression is an automated process. Industry employment greater than zero within a geographic region is suppressed if:

- 1) Less than 3 establishments in an industry for a geographic region; or
- 2) One establishment accounts for at least 80% of the total employment in an industry within a geographic region.

Secondary suppression is a manual process. When only one industry within a geographic region has been suppressed through primary suppression, then it becomes necessary to suppress data for at least one other industry within that geographic region to protect against the disclosure of individual data.

The institution of multiple worksite coding precludes the comparison of data beginning with 1991 with data from earlier years.

City of Chicago includes O'Hare International Airport.
