Wage Data 2022

**Occupational Employment and
Wage Statistics: Wage Data**
2022 Edition

Perhaps one of the best-kept secrets in the world of career exploration and business planning is the availability of local wage data, presented here in The Occupational Employment and Wage Statistics (OEWS) report. Oftentimes job seekers, for example, rely on national wage data when considering careers or negotiating salary offers. The Illinois Department of Employment Security is pleased to offer Wage Data 2022, a resource that will help customers make sound business and career decisions based on statewide wage data. Local wage data by Metropolitan Statistical Area (MSA), Local Workforce Innovation Area (LWIA), Economic Development Region (EDR), and county is available at <https://ides.illinois.gov/resources/labor-market-information/oews.html>. Whether you are exploring careers or evaluating your company's pay scale, Wage Data 2022 offers information relevant to your business or job.

Wage Data Contents

The data in this publication reflect the labor market in Illinois, while data for local areas in Illinois are online (see next page for online instructions). Entry, median, and experienced level wages for about 800 occupations in Illinois are available, from parking lot attendants to chief executives. Descriptions of job duties and examples of job titles for these occupations are listed on our website at <https://ides.illinois.gov/resources/labor-market-information/oews.html>.

The classification structure for occupations

The 2018 Standard Occupational Classification (SOC) system is used by federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, and disseminating data. All workers are classified into one of 867 occupations according to their occupational definition. To facilitate classification, occupations are combined to form 23 major groups, 98 minor groups, and 459 broad occupations. Each broad occupation includes detailed occupation(s) requiring similar job duties, skills, education, or experience. Because employment security agencies throughout the country use the SOC structure, data consumers enjoy these benefits:

Comparability of wage data across the private, public and military sectors

Previously, federal statistical agencies used different occupational classification systems, making it difficult to compare data across agencies.

Easy identification of occupations based on a more logical organizational structure

The occupations are grouped into 23 major categories according to work performed and required skills, education and training. The SOC code classifying the occupations is six digits in length. The first two digits indicate the major occupational category in which the occupation belongs. The remaining digits represent further aggregations of occupations.

Occupations that reflect the current labor market

Examples include biomedical engineers, environmental engineers, multi-media artists and animators, graphic artists, commercial and industrial designers, training and development specialists, and fitness and aerobic instructors.

Earnings in detailed service and professional occupations

For example, instead of accessing data for only social workers, customers will find data for child, family, and school social workers as well as medical and public health social workers.

When and how data are collected

Data comprising the OEWS report comes from a semiannual mail survey that measures occupational employment and wage rates for hourly and salary workers in nonfarm establishments in the United States. OEWS estimates in Illinois are constructed from a sample of responses from establishments covered by Unemployment Insurance. Surveys are mailed to these establishments in May and November of each year for a 3-year period. The OEWS program uses the U.S. Bureau of Labor Statistics' (BLS) Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel's data. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division. The procedure assumes that there are no major differences by geography, industry, or detailed occupation within the occupational division. Wage data in this report have been adjusted to the ECI factors of the first quarter of 2022. The updated data contained in this report are not official BLS data series and the BLS has not validated them.

Accessing state and local data online

Wage data for Illinois, its metropolitan areas, and other sub-state areas are available on the Illinois Department of Employment Security's website, which can be accessed here: <https://ides.illinois.gov/resources/labor-market-information/oews.html>. This page will give you access to a complete list of occupational wages. In addition, IDES offers all Illinois residents a variety of comprehensive, free-of-charge career exploration tools to help learn about the world of work, choose a career path, and explore education and training. Visit our Career Information System at <https://ides.illinois.gov/resources/labor-market-information/cis.html>.

New estimation methodology

Beginning with May 2021 estimates, the OEWS program has implemented a new estimation method. This new model-based method, called MB3, has advantages over the previous estimation method, as described in the Monthly Labor Review article at www.bls.gov/opub/mlr/2019/article/model-based-estimates-for-the-occupational-employment-statistics-program.htm. For more information, see the May 2021 Survey Methods and Reliability Statement at www.bls.gov/oes/methods_21.pdf.

Occupational Wages

Technical Notes

Collecting

Employment statistics are collected as part of a federal/state cooperative program called Occupational Employment and Wage Statistics or OEWS. Funding is provided by the U.S. Employment and Training Administration and the U.S. Bureau of Labor Statistics (BLS); the BLS also provides procedures and technical support while State Workforce Agencies (SWAs) collect the data. All states use the same codes making for uniformity across the nation.

The OEWS survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments. The survey uses the North American Industry Classification System (NAICS) to classify establishments (the physical location of a certain economic activity) and draws its sample primarily from reports submitted by employers to states' Unemployment Insurance (UI) programs. Occupational employment is the estimate of total wage and salary employment in an occupation across the industries surveyed. Employment is defined as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station regardless of whether that unit prepares their paycheck. The survey does not cover the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Reporting

Occupations are grouped in vertical clusters (for example, all computer-related occupations are together regardless of whether they are professional or clerical jobs) or industry clusters. Some occupations will appear more than once (if the occupation relates to several clusters, it will appear in each cluster).

Survey Facts

In November 2002, the OEWS Survey changed from an annual national survey of 400,000 establishments to a semiannual national survey of 200,000 establishments. The OEWS survey samples and contacts establishments in May and November of each year and, over 3 years, contacts approximately 1.2 million employers. The full 3-year sample allows the production of estimates at fine levels of geographic, industrial, and occupational detail.

Under the guidance of the BLS, state agencies update the wage data each year to provide the most current information for our customers. The OEWS program uses the BLS Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel's data. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division. The procedure assumes that there are no major differences by geography, industry, or detailed occupation within the occupational division. The wage rates for the highest wage interval are not updated.

The OEWS survey uses the Office of Management and Budget's (OMB) occupational classification system and the Standard Occupational Classification (SOC) system. The SOC system is the first OMB-required occupational classification system for federal agencies. The OEWS survey categorizes workers in 1 of more than 800 detailed occupations. Together, these detailed occupations make up 23 major occupational groups, one of which - military specific occupations - is not included in the OEWS survey. The major groups are as follows:

- Management occupations
- Business and financial operations occupations
- Computer and mathematical science occupations
- Architecture and engineering occupations
- Life, physical, and social science occupations
- Community and social service occupations
- Legal occupations
- Education, training, and library occupations
- Arts, design, entertainment, sports, and media occupations
- Healthcare practitioners and technical occupations
- Healthcare support occupations
- Protective service occupations
- Food preparation and serving related occupations
- Building and grounds cleaning and maintenance occupations
- Personal care and service occupations
- Sales and related occupations
- Office and administrative support occupations
- Farming, fishing, and forestry occupations
- Construction and extraction occupations
- Installation, maintenance, and repair occupations
- Production occupations
- Transportation and material moving occupations
- Military specific occupations (not surveyed in OEWS)

For more information about the SOC, please see the BLS website at <http://www.bls.gov/soc>.

An establishment is defined as an economic unit that processes goods or provides services, such as a factory, mine, or store. The establishment is generally at a single physical location and is engaged primarily in one type of economic activity. The OEWS Survey currently uses the NAICS system to classify all establishments. The scope of this survey includes establishments in most NAICS sectors.

The sectors are: Logging (1133), support activities for crop production (1151), and support activities for animal production (1152) only; Mining; Utilities; Construction; Manufacturing; Wholesale trade; Retail trade; Transportation and warehousing; Information; Finance and insurance; Real estate and rental and leasing; Professional, scientific, and technical services; Management of companies and enterprises; Administrative and support and waste management and remediation services; Educational services; Healthcare and social assistance; Arts, entertainment, and recreation; Accommodation and food services; Other Services (except Federal, State, and Local Government); Federal, State, and Local Government (OEWS designation). For more information about NAICS, see the BLS Web site at <http://www.bls.gov/bls/naics.htm>

The OEWS survey includes establishments in NAICS sectors 11 (logging and agricultural support activities only), 21, 22, 23, 31-33, 42, 44-45, 48-49, 51, 52, 53, 54, 56, 61, 62, 71, 72, 81 (except private households), state government, and local government. The U.S. Postal Service and the executive branch of the federal government are also included.

Data for specific occupations are collected from establishments in those industries that are the predominant employers of those occupations. Employees are reported in the occupation in which they are working, not necessarily for which they were trained.

Reliability

All wage data published in this report have a relative error of 50 percent or less, unless noted. This reflects the magnitude of sampling error for the occupation. Sampling errors occur because observations are made only on a sample, not the entire population.

Unavailable Data

Instances showing “N/A” in the data tables can be explained in the following ways:

- Wages for some occupations that do not generally work year-round, full-time, are reported either as hourly wages or annual salaries depending on how they are typically paid.
- The wage is equal to or greater than \$100.00 per hour or \$208,000 per year.
- Data were suppressed for confidentiality purposes.

Survey Sample Stratification

Wage Estimates

Employers reported their employment by occupation in each of twelve wage ranges, as below. Wage ranges or intervals are determined by the U.S. Department of Labor, Bureau of Labor Statistics.

Interval	Hourly Wages	Annual Wages
Range A	Under \$9.25	Under \$19,240
Range B	\$9.25 to \$11.99	\$19,240 to \$24,959
Range C	\$12.00 to \$15.49	\$24,960 to \$32,239
Range D	\$15.50 to \$19.74	\$32,240 to \$41,079
Range E	\$19.75 to \$25.49	\$41,080 to \$53,039
Range F	\$25.50 to \$32.74	\$53,040 to \$68,119
Range G	\$32.75 to \$41.99	\$68,120 to \$87,359
Range H	\$42.00 to \$53.99	\$87,360 to \$112,319
Range I	\$54.00 to \$69.49	\$112,320 to \$144,559
Range J	\$69.50 to \$89.49	\$144,560 to \$186,159
Range K	\$89.50 to \$114.99	\$186,160 to \$239,199
Range L	\$115.00 and over	\$239,200 and over

Entry, Median and Experienced

Entry level, median, and experienced wages are calculated using wage data only from establishments in those industries that are the predominant employers for an occupation.

Excluded from the calculations are data from employers in industries that do not typically employ workers in that occupation.

Entry wage: The mean (average) of the bottom third of wages in an occupation.

Median wage: The estimated 50th percentile of the distribution of wages; 50 percent of workers in an occupation earn wages below, and 50 percent earn wages above, the median wage.

Experienced wage: The mean (average) of the top two-thirds of wages in an occupation.

Confidentiality

Confidentiality guidelines are strictly observed. These guidelines are intended to preserve the anonymity of firms that participate in the survey and require that data for a particular occupation are suppressed (not shown in the report):

- when fewer than three firms responded for an occupation in a particular industry.
- when any one firm represents more than 50 percent of the employment in an occupation.
- when two firms combined represent more than 75 percent of the employment in an occupation.

Included and Excluded Workers

Workers or employees included in the OEWS survey:

- workers who can be classified as full-time or part-time employees
- workers on paid vacations or other types of leave
- workers on unpaid or short-term absences
- salaried officers
- executives
- staff members of incorporated firms
- employees temporarily assigned to other units
- employees for whom the reporting unit is their permanent duty station regardless of whether that unit prepares their paycheck.

Workers or employees excluded from the OEWS survey:

- the self employed
- owners/partners of unincorporated firms
- unpaid family workers
- household workers

Wages for the OEWS survey are straight-time gross pay, exclusive of premium pay.

Included are:

- base rate
- cost of living allowances
- guaranteed pay
- hazardous duty pay
- incentive pay including commissions and production bonuses
- on-call pay
- tips

Excluded are:

- back pay
- jury duty pay
- overtime pay
- severance pay
- shift differentials
- nonproduction bonuses
- tuition reimbursements

For more information on the creation of the Occupational Employment and Wage Statistics, please see the Occupational Employment and Wages Technical Note at: <http://www.bls.gov/news.release/ocwage.tn.htm>.
