1 MyTax

This section focuses on MyTax changes associated with the latest version upgrade.

1.1 Customer Authentication

Passkey support has been added for MyTax authentication. Logging in with a passkey allows you to skip two-step verification.

You also have the option to add multiple authentication methods. This will allow extra protection for the account as well as additional password reset verification options if you forget or lose one of your authentication methods.

Manage How You Sign In

These authentication methods determine how you sign in to your MyTax profile. Unless you sign in using a passkey or on a trusted browser, you'll be prompted to use two of these methods each time.

[Disable](#) two-step verification in development environments only.

Almost done! Add at least one more method to protect your account.

There is also a new hyperlink available from the sub panel called **View More Employer Details** where you will need to navigate to **see** anything related to your **Tax Rates and Charge Information**.

You used to have to navigate to the *View all Account options* hyperlink and then the *View Rate History hyperlink* to see the rating information. This hyperlink is **no longer available** and will only be available from the *View More Employer Details* hyperlink in the latest version.

1.3 Benefit Charges

Charge information was not previously available on MyTax. In the previous version, you only had access to view your Charge Statement Letters on MyTax. In the latest version, you can still **see your charge statements** from the **View More Employer Details** hyperlink.

There is also new functionality for you to be able to **Search your Benefit Charges** using a date range or a specific Employee SSN.
