Unemployment Decreases, Payrolls Rise as Industries Reopen

SPRINGFIELD – The Illinois Department of Employment Security (IDES) announced today that the unemployment rate fell -2.0 percentage points to 15.2 percent, while nonfarm payrolls added +62,200 jobs in May, based on preliminary data provided by the U.S. Bureau of Labor Statistics (BLS) and released by IDES. The April monthly change in payrolls was revised from the preliminary report from -762,200 to -738,600 jobs. The April unemployment rate was also revised from the preliminary report, from 16.4 percent to 17.2 percent, as a result of large monthly revisions to unemployed and employed in April.

The May payroll jobs estimate, and unemployment rate, reflects activity for the week including the 12th. The BLS has published [FAQs](#) for the May payroll jobs and the unemployment rate.

The state's unemployment rate was +1.9 percentage points higher than the national unemployment rate reported for May, which was 13.3 percent, down -1.4 percentage points from the previous month. The Illinois unemployment rate was up +11.1 percentage points from a year ago when it was 4.1 percent.

The three-month average Illinois payroll employment estimate was down -245,800 jobs during the March to May three-month period, compared to the February to April three-month period. The largest average declines were found in Leisure and Hospitality (-95,700), Trade, Transportation and Utilities (-33,600) and Educational and Health Services (-30,000).

“As we continue to grapple with the unprecedented impact of the COVID-19 pandemic, we remain committed to safely reopening the state to begin economic recovery,” said Deputy Governor Dan Hynes. “We remain focused on providing working families and small businesses the tools necessary for recovery as we move through each phase of the Restore Illinois plan.”

“While unemployment is trending in the right direction, the Pritzker administration continues to take bold actions designed to support Illinois businesses and residents displaced by the unprecedented global health crisis,” said Michael Negron, Acting Director of the Department of Commerce and Economic Opportunity. “Our strategy to encourage social distancing and important investments in expanding testing and contact tracing will enable businesses to safely reopen, bringing staffing levels back up, returning Illinoisans to work, and giving our economy the reboot it needs.”

Compared to a year ago, nonfarm payroll employment decreased by -737,900 jobs, with losses across nearly all major industries. The industry groups with the largest jobs decreases were: Leisure and Hospitality (-285,200), Trade, Transportation and Utilities (-102,100) and Professional and Business Services (-96,100). Illinois nonfarm payrolls were down -12.1 percent over-the-year as compared to the nation's -11.7 percent over-the-year decline in May.

The number of unemployed workers fell sharply from the prior month, a -9.1 percent decrease to 955,100 but was up +261.0 percent over the same month for the prior year. The labor force was up +2.7 percent over-the-month and down -2.5 percent over-the-year. The unemployment rate identifies those individuals who are out of work and seeking employment. An individual who exhausts or is ineligible for benefits is still reflected in the unemployment rate if they actively seek work.

IDES maintains the state's largest job search engine, [Illinois Job Link](#) (IJL), to help connect jobseekers to employers who are hiring, which recently showed 192,804 posted resumes with 58,267 jobs available.

- 2015-2019 seasonally adjusted labor force data for Illinois, and all other states, have been revised as required by the U.S. Bureau of Labor Statistics (BLS). The monthly historical revisions to state labor force estimates reflect new national benchmark controls, state working-age population controls, seasonal factors, as well as updated total nonfarm jobs and unemployment benefits claims inputs. Illinois labor force data were also smoothed to eliminate large monthly changes as a result of volatility in the monthly Census Population Survey (CPS) and national benchmarking. For these reasons, the comments and tables citing unemployment rates in previous news releases/materials may no longer be valid.
- Monthly seasonally adjusted unemployment rates for Illinois and the Chicago-Naperville-Arlington Heights Metropolitan Division are available [here](#).
- Monthly 2011-2019 seasonally adjusted nonfarm payroll employment data for Illinois have been revised. To control for potential survey error, the estimates are benchmarked annually to universal counts derived primarily from unemployment insurance tax reports.
- Not seasonally adjusted jobs data with industry detail are available [here](#). “Other Services” include activities in three broad categories: personal and laundry; repair and maintenance; and religious, grant making, civic and professional organizations. Seasonally adjusted data for subsectors within industries are not available.

About the Department of Employment Security

The Illinois Department of Employment Security (IDES) provides vital employment services to Illinois workers, employers, and job seekers with resources including [Job Fairs](#) and [Illinois Job Link](#), analyzes and disseminates actionable [Labor Market Information](#), and administers the [Unemployment Insurance Program](#). To see the full range of services provided by IDES, and for the latest news concerning the department, visit IDES.Illinois.gov.
